

BIO-BOMBS™ IAQ

QUICK RELEASE

IMPROVE
INDOOR AIR
QUALITY

Have you tried absolutely everything to remove that persistent malodor from certain residential or commercial spaces with no success? Look no further. BIO-BOMBS™ IAQ has you covered. We don't mask odors with fragrance. We don't use aerosols or sprays. We use science. Our odor bombs are designed to eliminate foul odors by destroying them at their source.

How it works: When a BIO-BOMBS™ IAQ tablet is submerged into water, a rapid reaction generates a gas called Chlorine Dioxide (ClO_2). This gas quickly leaves the water, occupies the enclosed odor-ridden space and a microscopic airborne battle ensues, resulting in a BIO-BOMBS™ IAQ win everytime.

IF YOU'RE CURIOUS ABOUT THE SCIENCE, READ ON. CHLORINE DIOXIDE:

- Is a gaseous molecule made up of 2 oxygen atoms and 1 chlorine atom.
 - Is an extremely versatile and effective oxidizer, with tremendous application potential.
 - Is so small (0.124 nm) that it can deodorize even the tiniest crevices inside a car.
 - Is able to denature odor causing sources on all surfaces including seats, headliners, carpets, visors, seat belts and even the ventilation system.
- Simply put, one BIO-BOMBS™ IAQ will restore air freshness and provide a pleasant, odor-free environment by removing smelly volatile compounds.
