★ **2-Sided Glass & Surface Cloth 12/Pack**

This two-sided **8 x 10** cloth provides the best of both worlds. On one side is a fine weave glass cloth, but on the flip side, a yellow cloth for dusting, drying or sanitizing.

FOR USE WITH
GLASS & SURFACE

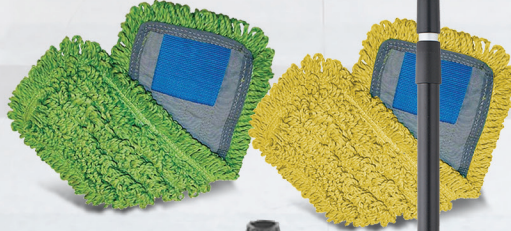

★ **SYNERGY 'SPIN & DROP' MOPPING SYSTEM**

This system, available with your choice of two mop styles and two trolley configurations is our entry level to breaking free from the traditional string mop and bucket-wringer combination your grandfather would have used. Both styles of mops feature soil-capturing microfiber, and both trolley units allow you to separate the soil-rinse water from the detergent charge water.

SYNERGY™ SB
SOLUTIONS FOR CLEANING

If consistently used with our **Synergy Solution™** chemistry, and reserved for use on normal soils (no glues, adhesives, sealers or finishes), you can be assured of 300-500 laundering cycles. Both systems are designed for large areas with very remote access to fresh water. Be sure to check out our Split and Divided Bucket Training Page at the end of this brochure.

★ **SYNERGY BIOCLEAN™ BUCKETLESS MOPPING SYSTEM**

This system, designed for the facility with few and remote hard floor locations to clean, allows you to take your entire mopping system anywhere you need in a single hand and ready to mop up to 1000sf in a charging. Mops are color-coded for use with either **Synergy BioClean™** (for offices and common areas) or **Synergy Envirotab™** (for restrooms).

★ **SYNERGY BIOCLEAN™ BUCKETLESS MOPPING WITH ROCKER FRAME**

This mopping system is like no other in that it employs our proprietary **Rocker Frame™** which reduces the drag commonly associated with microfiber flat mops. When used as directed (see our Training Pages at the end of this brochure) you will improve your clean and reduce your strain by 40-60% with every pass.

The **SYNERGY™** team has spent hours mopping floors and understands first-hand how tough the job can be. Our team of industrial designers and engineers, with over 65 years of combined experience in the commercial and household cleaning industries, have custom designed all our microfiber products to make your job just a little bit easier.

BIOCLEAN ALL-SURFACE

HOW TO PREPARE YOUR FLUID FOR USE

PREPARE BIOCLEAR FLUID FOR USE

1

① Attach Rocker Frame to Fluid Handle so that narrowest edge is on same side as dispensing tube

2

② Attach a green or yellow damp mop pad to Rocker frame

3

③ Remove green refill cartridge from Fluid body by holding firmly and pulling up

4

④ Firmly tighten bottom cap on refill bottle

⑤ Remove top cap and fill with water plus 1oz of BioClean or (1) 1g **Envirotab™**. Replace top cap and tighten

5

⑥ Insert green refill cartridge back into Fluid body. Press down on top of bottle until you feel a solid click, indicating that the bottle is properly inserted

6

⑦ Squeeze trigger to ensure liquid is dispensing from tube. If no liquid dispenses, press down on bottle to ensure it is fully inserted.

7

⑧ To clean, wipe with a BioClean microfiber cloth using water. To clean the refill bottle, remove top and bottom caps and rinse.

TIPS

Always empty your fluid and rinse the refill bottle when storing for more than one week

SPIN & DROP MOPPING SYSTEM

BIOCLEAN ALL-SURFACE

DUAL COMPARTMENT MOP BUCKET CHART

7 QUICK & EASY STEPS TO A CLEANER AND HEALTHIER ENVIRONMENT.

INSTRUCTIONS

STEP 1

FILL BUCKET

Front compartment with 3 gallons of cleaning solution. Fill rear compartment with 1 gallon of clear water.

STEP 2

INSTALL MOP

Install tab mop on frame and slide tabs through opening and clamp down.

STEP 3

CHARGE MOP

Charge mop in front compartment with solution.

STEP 4

WRING MOP

Wring out excess solution from mop making sure correct moisture.

STEP 5

MOP SURFACE

Mop hard surface areas. Use mop until dry.

STEP 6

RINSE MOP

Rinse mop in rear rinse compartment.

STEP 7

WRING MOP & REPEAT

If heavily soiled, return to STEP 6, if not return to STEP 3 and repeat.

★ SYNERGY PRO-PROCKET™ MOPPING SYSTEM

This mopping system is designed for the super - conscientious cleaning specialist who is determined to ensure that cross - contamination is to be someone else's concern - they know that it just can't happen on their watch. Each Mop Charging Bucket will hold up 15-18 mops that have each been pre-moistened for mopping (up to 250sf). When the mop becomes soiled it is retired to the laundering bag for machine cleaning. Prepare your floor care kit just once and be ready to clean up to 4500sf of hard surface flooring while NEVER using dirty water.

#SM-CART-LG

The Synergy Pro-Pocket™ System can be used as a carry-anywhere system (under 20 lbs) or as part of our Small or Deluxe Mopping Trolleys. Each trolley allows for storage of soiled mops and the Deluxe Trolley also provides for carrying nearly 40 cleaning cloths. We carry both cloths and mops in Green (for use with Synergy BioClean™ Plus) and Yellow (for use with Synergy Envirotab™).

★ SYNERGY WALL WASHING TOOLS

#SM-CG3B (OR G)

#SM-L10WG

#SM-F10V

#SM-TEL-HDL

Our Wall Washing Kit is primarily designed for the terminal or OdorPros™ Cleaning professional that must remove soot and other grime from the walls of homes and apartments once occupied by smokers; though the same system can be used for restroom or foodservice area cleaning. The components we offer are: **A charging pail, 10" Velcro frame, Telescoping Handle and looped mop head.**

POCKET-MOP SEALED BUCKET

BIOCLEAN ALL-SURFACE

INSTRUCTIONS

STEP 1

Load mops in sealing bucket microfiber side down, except for top mop which is microfiber-side up to prevent splashing.

STEP 2

Measure the correct amount of cleaning solution. See mix chart for proper addition rates. Do not estimate!

STEP 3

Add Solution - pour cleaning solution over mops evenly, and allow to penetrate mops.

STEP 4

When there is less than 1/2 inch of solution visible in the bucket, place lid on bucket and make sure lid is secure.

MIX CHART

MOPS	GALLONS	LITERS
6	.37	1.4
9	.50	1.9
12	.75	2.8
18	1.20	3.8
21	1.25	4.7
24	1.50	5.6

STEP 5

Flip bucket with lid on. Allow to sit in this position for up to five minutes.

STEP 6

Turn over top mop. Collapse pocket mop frame by stepping on lock release, and place frame into position on top mop. Press down as frame slips into pockets until frame locks into place.

STEP 7

Clean floors and any other water-safe surfaces. Each mop will clean 400-500 square feet

STEP 8

Place soiled mops in proper receptacle by collapsing frame and letting pocket mop slide off frame. Repeat steps 6-8 until area is clean.
